

# How to update firmware through PC

**You will learn how to update EZCast Duo's firmware with our PC tools through the following methods.**

The tool you may need:

1. Micro USB cable: To connect EZCast Duo with your PC.
2. A Windows Based PC, running Win 7 or above.

Please follow the methods to update FW.

### Step 1: Download EZCast Repair Tool to your Windows PC

Downloaded the update package to your Windows PC.

Uncompressed the file. (attached at the bottom of this page)

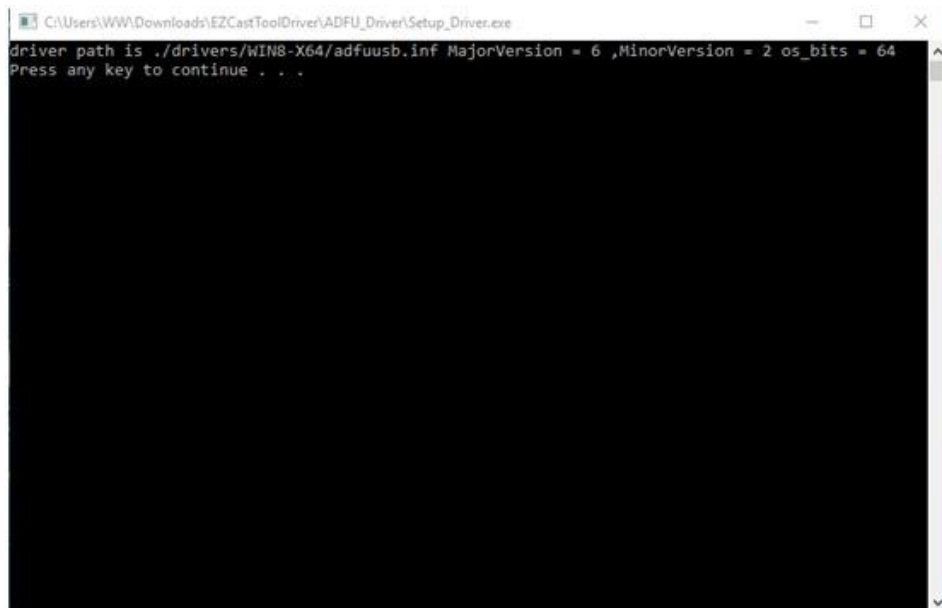

### Step 2: Turn on ADFU\_Driver file

Double click the “Setup\_Driver.exe” file to install the driver.

ADFU_Driver	2019/4/10 14:37	文件夹	
EZUpdate	2019/4/10 9:29	应用程序	1,964 KB
Repair Tool User Guide	2019/4/10 14:43	Adobe Acrobat ...	374 KB

  

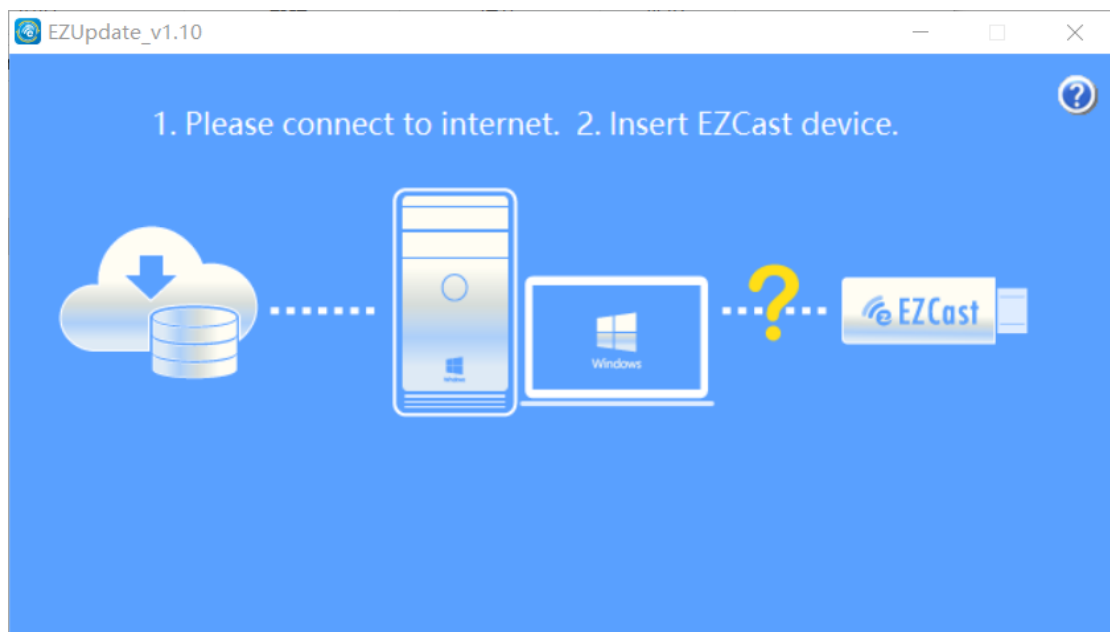

drivers	2019/4/10 14:37	文件夹	
Setup_Driver	2019/4/10 9:28	应用程序	72 KB

After installing the driver, please double click the “EZCastUpdate” file.

ADFU_Driver	2019/4/10 14:37	文件夹	
EZUpdate	2019/4/10 9:29	应用程序	1,964 KB
Repair Tool User Guide	2019/4/10 14:43	Adobe Acrobat ...	374 KB

**Step3. Enter update mode**

Connect micro USB port to EZCast Duo, press and hold the reset button while plugging the USB cable to PC (Please keep holding Reset button). You may need to wait for 3~5 seconds for PC to recognize the USB device. (Note: The Reset button is located in the center of LED bar, you may feel a click when you press it)

The reset button.

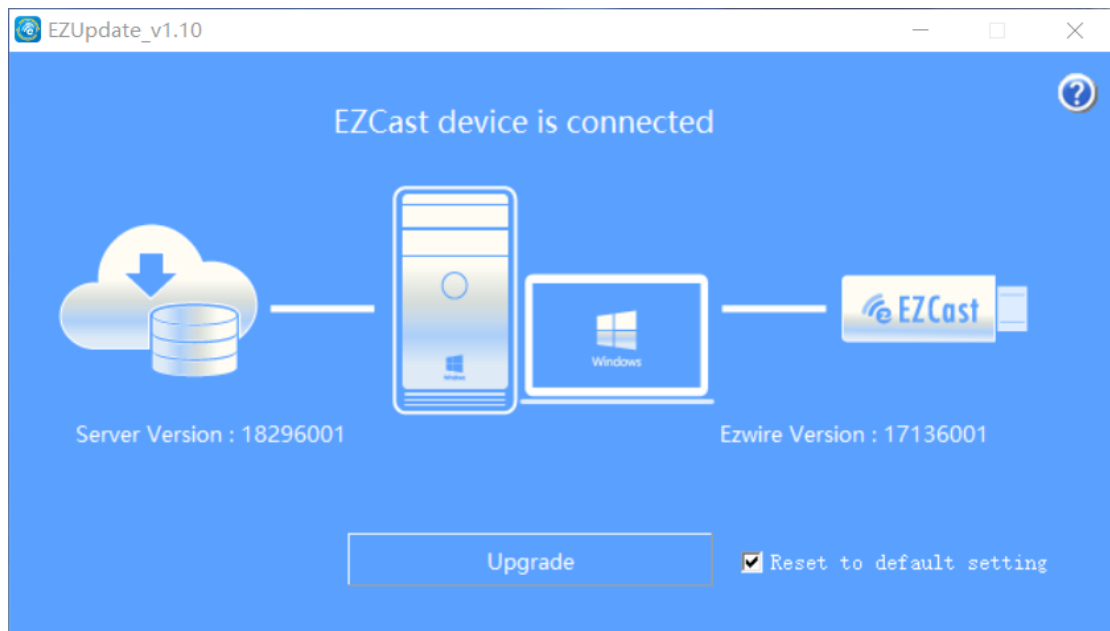

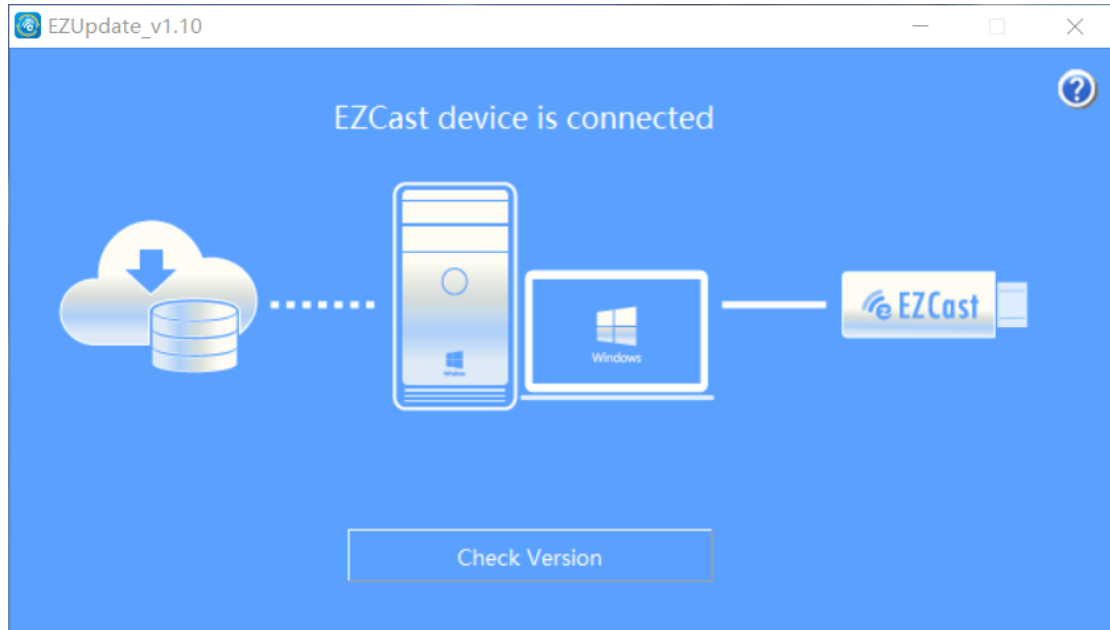

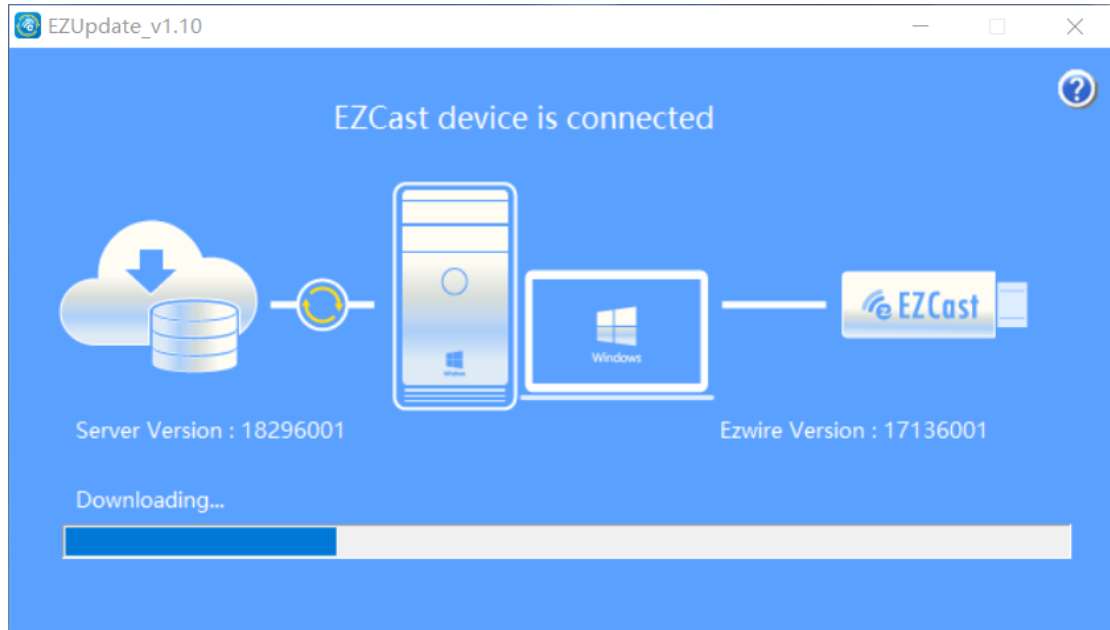

PC displays the following screen to indicate the device is found and connected to the PC, and then you can release the reset button for next step.

#### **Step 4. Update firmware**

Click “Check Version”, the tool will start to compare the FW version between dongle and our cloud server. If the tool shows “No Version Info”, you can ignore it and keep upgrading the FW.

*\*please be noted your PC must connect to internet first.*

The FW is successfully updated when you see the following message.

After the update is done, please unplug the dongle and connect to TV to enjoy latest FW version!
